EXPERIENCE

Web Development Intern | Arc solutions – Dehradun — May 2024 - Present
- Collaborated with a team to design, develop, and maintain web applications using PHP and Reactjs, enhancing functionality and user experience.
- Assisted in the software development life cycle, including coding, testing, and debugging, to ensure high-quality software applications.

Travel Website
- Designed and developed multiple travel and hotel websites, including 3-4 dedicated travel portals with multi-page functionality.
- Built and optimized key pages such as Chardham Yatra and Tourist information sections, enhancing user experience and engagement.

School Website
- Developed 2-3 School websites, including both static and dynamic versions, ensuring responsive design, user-friendly navigation, and seamless functionality.

PROJECTS

Personal Project
- Bootstrap-Based Template Development: Created a responsive sheet template using Bootstrap. Designed CRUD functionality in PHP with a MySQL database.

PedagogyTime Web Project
- PedagogyTime Platform Development: Designed an online learning platform with PHP, HTML, and CSS, enabling students to select teachers, view schedules, and providing an admin panel for monitoring
- Authentication System Implementation: Implemented a secure authentication system for teachers, ensuring safe and efficient profile management.

Alliance Security Web Project
- Developed and implemented an attendance management system using scanning technology, integrating real-time security personnel data for enhanced operational efficiency.
- Addressed and solved issues related to project location, optimizing logistics and resource allocation.

Arc Solution Company Web Project
- Dynamic and Responsive Company Website: Designed a company website using ReactJS and Tailwind CSS, integrating a pre-designed template for a modern UI.

Tiitan Classes Coaching
- Developed a dynamic learning platform for using PHP, tailored to support students preparing for JEE and NEET exams.

Demo Voting
- This Demo Voting System lets users log in with their ID, share voting links, and manage data using React, PHP, and SQL—fast, secure, and efficient.

Solar Power Panel
- Online Platform for Solar Product Purchase, Battery Orders, and Installation Services

Shree Astro Solution
- Designed and developed a static website using HTML,CSS, and custom Templates.
